WELCOME BACK!!
Reminder!!!!
Internet Native Banner (INB) Has Been Decommissioned
All Users Should Be Logging Into Banner 9 AppNav

The website to login to AppNav is www.gosolar.gsu.edu

Then select Banner 9 Application Navigator (AppNav BPROD).

**NOTE:** When accessing Banner Administrative Application from **Off-Campus** VPN is required.

To better protect Personally Identifiable Information (PII data), access to Banner-related administrative applications will be restricted to Georgia State University networks only beginning on Monday, December 17. This means you will need to use Georgia State’s Virtual Private Network (VPN) to access Banner-related administrative applications from off-campus locations.

Directions for installing a client for connecting to the VPN before accessing Banner-related administrative applications from off campus can be found here: https://technology.gsu.edu/technology-services/it-services/security/virtual-private-network/

Log into the VPN using your CampusID and password.

The applications affected include Banner 9 Application Navigator and applications such as Banner Job Output, WebXtender, Workflow, Tape Load, and DegreeWorks Web Scribe.

For assistance with VPN, contact the IIT Service Desk at help@gsu.edu, or 404-413-HELP (404-413-4357).
